

HP+™ Consultative Solutions

A holistic, systems-centric
approach to homebuilding

Achieve tighter construction in your residential construction projects with fresh air ventilation, improved thermal performance, right-sized mechanicals, greater moisture management, increased combustion safety and more with BASF's HP+™ Consultative Solutions. Our collection of robust support services brings the insight of the experts within BASF's Center for Building Excellence directly to homebuilders like you, connecting you to a wealth of collected knowledge about beyond code methods and more.

 **BASF**
We create chemistry

Build upon our insight.

If you're a homebuilder looking for a unique and powerful way to meet the growing demand for more sustainable, high-performance homes, put the strength of BASF to work for you. Our multidisciplinary team of building scientists, architects, engineers and sustainable construction experts is using chemistry as the catalyst for more energy-efficient, durable and comfortable construction. Now, through our BEYOND.High Performance[®] platform, we bring their leadership and insight directly to you, with a robust collection of powerful HP+[™] Consultative Solutions that, when paired with the assemblies in our HP+[™] Building Enclosure Systems, can help you achieve energy code compliance, reduce callbacks and liability and improve your HERS^{®*} Index scores.

+ A singular resource. A wealth of knowledge.

Enjoy truly tailored solutions that meet your unique, yet shifting residential construction needs with direct access to the experts of the BASF Center for Building Excellence. Each team member brings expertise in his or her own construction discipline to the fore, working collectively to provide you with a unique, synergistic and singular resource. From engineering and architectural coordination and cost component analysis, to trade integration and performance reviews, to product training and QA/QC implementation, HP+ Consultative Solutions synchronize the many moving parts inherent to each of your design and construction challenges.

Third-Party Certifications

Our BEYOND.High Performance[®] approach can help you achieve third-party certifications such as:

Contact the BASF Center for Building Excellence to discover how BASF's BEYOND.High Performance approach can simplify and streamline the sustainable construction process for you, and provide you with the opportunities you need to be successful today ... and beyond.
